

Lighting the way ...

City of Leesburg offers many styles of lighting from yard lights to decorative post top fixtures.

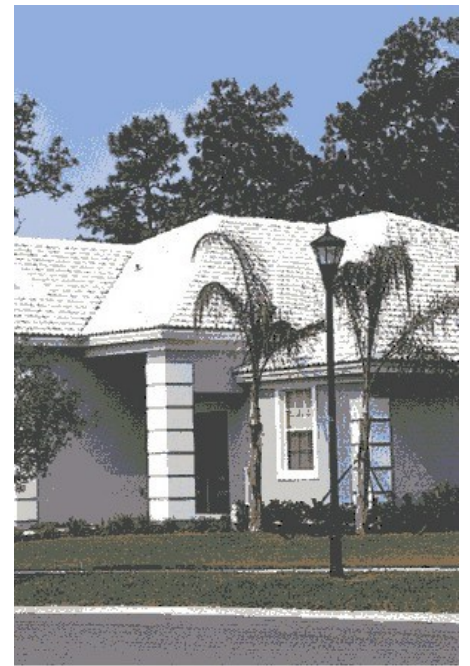

The benefits of rental lights from the City of Leesburg not only include improved visibility, but the enhancement of the beauty of your home or business.

It's so easy. Just call, and a City of Leesburg Electric Service Planner will visit your business or home to help you choose a fixture and location that best suits your needs. Then we will handle every detail, from design, to installation, to long-term maintenance.

This is one more example of the City of Leesburg Electric Department's commitment to providing excellent customer service. For further information call the City of Leesburg Electric Department at (352) 728-9830 and ask to speak to an Electric Service Planner.

In addition to esthetic value, good and effective outdoor lighting also reduces the possibility of accidents or injuries by making curbs, walkways, and other areas more visible at night.

The increased night time visibility will make your family, visitors, or customers feel more comfortable and secure. Visitors and customers have a sense of greater safety in areas that are brightly lit.

Burglars, vandals, and other criminals tend to avoid brightly lit areas where they are more likely to be detected. You'll feel better knowing exactly who is in the neighborhood.

Light Fixtures

Dusk to Dawn

Lamp MH: 100 Watt

Light Color: Yellow

Mounting Height: 25' to 30'

Poles: Concrete, Wood

Open at the bottom to distribute light downward in an even circle, this is the ideal choice for extra security. It offers extra protection for your family and friends, and it's neighbor friendly. These lights are typically installed on 3' or 6' arms. This light is the most economical light we offer.

COBRA

Lamp HPS:100 and 250

Light Color– Yellow

Mounting

Height: 30' to 40'

Poles: Concrete, Wood

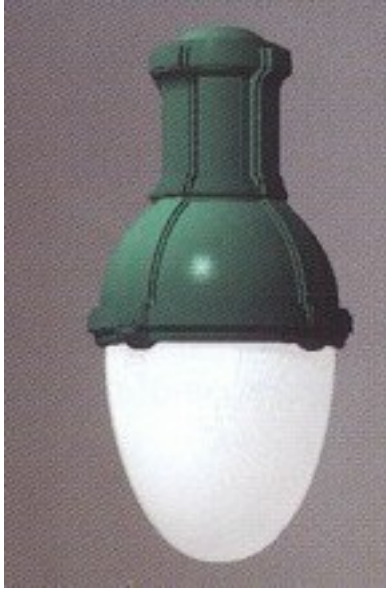

This fixture is efficient, economical, and everywhere.

No-nonsense design and sturdy construction has given the Cobra a prominent place on well-traveled streets

And highways across America. These work well on roadways and parking lots.

RENAISSANCE

Lamp MH: 250 Watt - 400 Watt

Light Color: White

Mounting

Height: 30' to 45'

Poles: Aluminum

Nothing symbolizes elegance like the Renaissance fixture. This is the perfect fixture for illuminating commercial or residential roadways.

Available in green, and black.

Mongoose

Lamp MH: 400 Watt

Light Color: White

Mounting

Height: 30' to 45'

Poles: Aluminum

Ideally suitable for Municipal Boulevards in a modern urban setting, the lighting system performs well at heights between 20 and 30 feet. Furthermore, effectively illuminate and enhance commercial plazas, campuses, waterfronts and outdoor retail centers.

This light can installed on a decorative Aluminum pole, Concrete pole or Decorative Concrete pole. The light is only available in green or black.

FLOOD

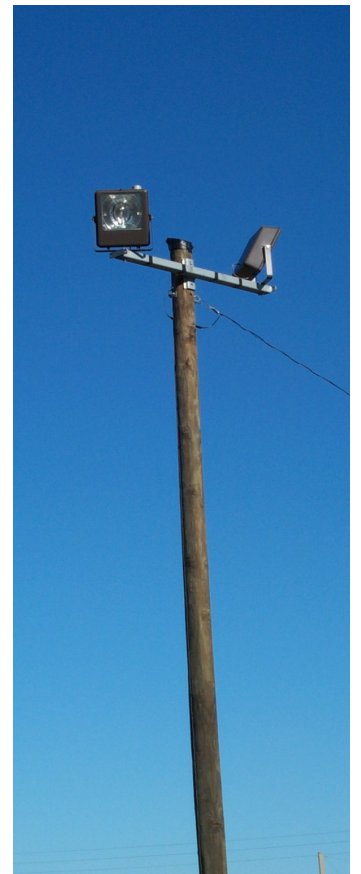

Lamp MH: 400, 1000 Watt

Light Color: White

Mounting Height: 28' to 35'

Poles: Concrete or Wood

The Floodlight allows light to be focused where it's needed when extra light is required. The Floodlight provides a bright white light that can be aimed to get into hard to reach areas, and cover a larger area.

Decorative Post top Fixtures

COLONIAL

Lamp HPS: 100 Watt

Light Color: White

Mounting Height: 20'

Poles: Fiberglass, Concrete

One of our most popular designs, the Colonial has a charm all its own. The authentic Nantucket styling lends the flavor of Early Americana to even the newest neighborhood. This is our most economical Post Top Fixture!

ACORN

Lamp HPS: 100 Watt

Mounting Height: 16'

Poles: Decorative Concrete,
Fiberglass & Poly-steel

A very popular addition to any home or neighborhood. A classic fixture crafted with a durable acrylic globe that will enhance any residence or roadway. This fixture is installed in the Palmora Park Neighborhood.

FLAGLER

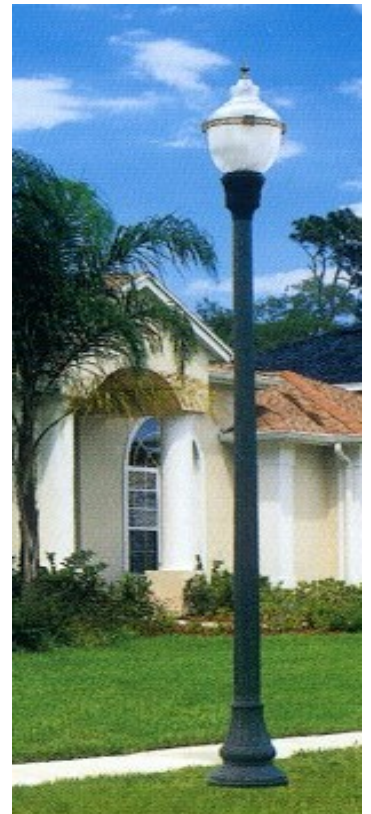

Lamp HPS: 100 Watt

Light Color: Yellow

Mounting Height: 16'

Poles: Decorative Concrete, Black Fiber-glass

A gold finial and band accent this large decorative globe, which glitters in the daylight, adding a warm, traditional touch even when it isn't illuminating the landscape.

MONTICELLO

Lamp HPS: 100 Watt

Light color: Yellow

Mounting Height: 16'

Poles: Decorative Concrete

Features include a glass globe.

Nothing symbolizes Main Street America quite as well as this fixture. The globe incorporates the historic elegance of an eight-sided lantern, and there's timeless beauty in every carefully-crafted detail.

GRANVILLE

Lamp MH: 100 Watt

Light Color; White

Mounting Height: 16'

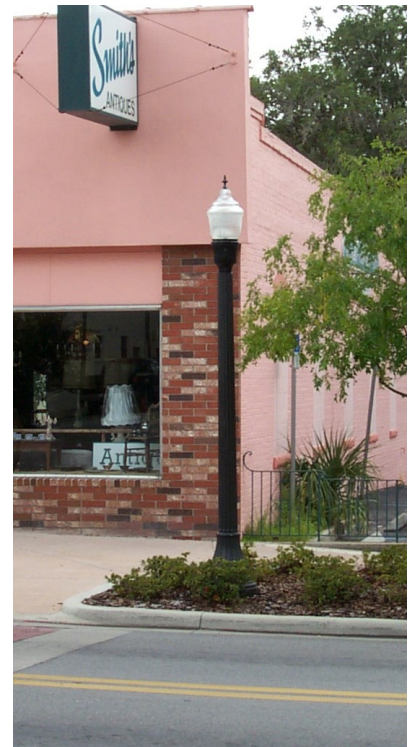

Poles: Decorative Concrete,
Fiberglass & Poly-steel

Features include a glass globe.

A very popular design, this handsome fixture recalls the classic elegance of another time. The glass globe recreates the mood of the early 20th century. This fixture is used along Main Street to give it that early look.

Shown with decorative concrete pole.

Decorative Poles

The City of Leesburg offers a selection of Decorative poles for our Post top fixtures. These include Fiberglass, Concrete, Aluminum and Poly Steel poles.

Black Fiberglass Pole

The Black Fiberglass Pole is a 20' fiberglass pole that is offered without the decorative base. This pole can be combined with the any of our decorative Post top lights. Any combination will be an excellent choice for residential roadway lighting or security lighting.

POLY-STEEL

Washington

The Washington Post was designed around 1910 for street lighting in our nation's capital. Today you will find the classic double fluted base and tapered shaft have become a standard American design. This pole has a 12' Mounting Height.

WASHINGTON aka “Street Scape”

In 1910 the Commission of Fine Arts in Washington D.C. designed the simple, classically fluted lighting standard on which Ameron's Washington pole is based. Typically used with the Granville Fixture. The mounting height is 10'. The pole is featured in Downtown Leesburg, along Main Street.

COLONIAL Decorative Concrete

This pole is available only in 16 and 22' pole lengths. This pole is a decorative concrete pole.

Promenade Dec. Concrete Pole

This pole is available
in only 35' pole,
which is a 28'
mounting height.

Renting a light from the City of Leesburg is easy. Just call 352-728-9830 and ask to speak to an Electric Service Planner.

A monthly rental fee will be charged to your electric bill each month for lighting.

This rental fee has three (3) components; Fixture Charge, Energy Charge and Bulk Power Charge. If a Pole is required, a monthly rental fee for the pole will apply. There are no initial fees for the installation of a light.

Fees will apply for the installation of underground secondary that will supply the lights with power.
